

Bioconductor Award 2021

Certificate

Charlotte Soneson

For outstanding contributions to the Bioconductor project and community

Charlotte is an outstanding long-term contributor to the Bioconductor project, both in terms of package development and community contributions. She has developed or contributed to more than a dozen Bioconductor packages, with recent highlights including single cell analysis packages such as iSEE, but also ExploreModelMatrix, velociraptor, CONQUER and related resources. Her contributions span new methods and software for new technologies, as well as exploration and visualization, facilitating evaluation, benchmarking and teaching. She has helped to organize a number of meetings including BioC and EuroBioC conferences, and provides great service as a highly organized and efficient member of the Technical Advisory Board. She is part of the Bioconductor teaching group and provides superb lectures at courses and conferences worldwide. Charlotte is a Bioconductor “ambassador” and helps with a number of community engagement and outreach programs. She is approachable and helpful to novice and experienced community members alike.
