

Package ‘SomatiCAData’

April 1, 2025

Version 1.44.0
Title An example cancer whole genome sequencing data for the SomatiCA package
Description An example cancer whole genome sequencing data for the SomatiCA package
Author Mengjie Chen
Maintainer Mengjie Chen <mengjie.chen@yale.edu>
Depends R (>= 2.14)
License Artistic-2.0
LazyData yes
biocViews ExperimentData, Genome, CancerData, SequencingData
InstallableEverywhere yes

SomatiCAData-package	<i>An example cancer whole genome sequencing data for the SomatiCA package</i>
----------------------	--

Description

A dataset of a paired tumor-normal sequencing sample from Complete Genomics.

Author(s)

Mengjie Chen <mengjie.chen@yale.edu>

Maintainer: Mengjie Chen <mengjie.chen@yale.edu>

Examples

```
data(glio)
```

glio

Sequencing data for a tumor sample with control.

Description

A dataset of a paired tumor-normal sequencing sample from Complete Genomics.

Usage

```
data(glio)
```

Format

A data frame with 3458745 rows on the following 7 variables.

seqnames a character vector

start a character vector

zygosity a character vector

tCount an integer vector

LAF a numeric vector

tCountN an integer vector

germLAF a numeric vector
