

Package ‘scanMiRData’

April 24, 2025

Type Package

Title miRNA Affinity models for the scanMiR package

Version 1.15.0

Depends R (>= 4.0)

Date 2023-07-03

Imports scanMiR, utils

Suggests knitr, rmarkdown, BiocStyle

Description This package contains companion data to the scanMiR package. It contains
`KdModel` (miRNA 12-mer binding affinity models) collections corresponding
to all human, mouse and rat mirbase miRNAs. See the scanMiR package for
details.

BiocType ExperimentData

License GPL-3

VignetteBuilder knitr

RoxygenNote 7.1.1

getKdModels	2
KdModels-hsa	2
KdModels-mmu	3
KdModels-rno	3

Index**4**

`getKdModels`*getKdModels*

Description

Returns a collection of miRNA KdModels for the requested species. *Note that by default, low-confidence miRNAs are not returned* (see ‘categories’).

Usage

```
getKdModels(species = c("hsa", "mmu", "rno"), categories = NULL)
```

Arguments

<code>species</code>	Either "hsa" (human), "mmu" (mouse) or "rno" (rat)
<code>categories</code>	The categories of miRNAs to return. Any combination of "Low-confidence", "Poorly conserved", "Conserved across mammals", "Conserved across vertebrates". If NULL (default), all categories are returned. miRNAs with NA as conservation are not returned unless ‘categories==NULL’.

Value

An object of class `KdModelList`

Examples

```
mods <- getKdModels("rno")
summary(mods)
```

`KdModels-hsa`*KdModelList for human miRNAs*

Description

A list of binding affinity models (`KdModel`) for human ('hsa'), mouse ('mmu'), or rat ('rno') miR-base 21.1 miRNAs. These represent the miRNA 12-mer binding affinities predicted using the CNN from McGeary, Lin et al. (2019).

Value

a `KdModelList` list.

KdModels-mmu	<i>KdModelList for mouse miRNAs</i>
--------------	-------------------------------------

Description

A list of binding affinity models ([KdModel](#)) for mouse miRbase 21.1 miRNAs. These represent the miRNA 12-mer binding affinities predicted using the CNN from McGeary, Lin et al. (2019).

Value

a [KdModelList](#) list.

KdModels-rno	<i>KdModelList for rat miRNAs</i>
--------------	-----------------------------------

Description

A list of binding affinity models ([KdModel](#)) for rat miRbase 21.1 miRNAs. These represent the miRNA 12-mer binding affinities predicted using the CNN from McGeary, Lin et al. (2019).

Value

a [KdModelList](#) list.
